

Beat Kitchen Studios

Production Services

Pre Production, Recording, Beats, Songwriting Sessions	\$30 per hour
Mixing Services	\$75 per track
Usage fee for Beat Kitchen Studios Productions	\$300 per track

Beat Kitchen Studios is a quaint production suite tucked in the heart of Marrickville. We are proud to offer our professional space for recording, pre production, beats, songwriting & mixing services.

For **pre production & recording sessions**, our rate is **\$30 per hour**. This price also covers the cost of an engineer / producer to run the session. There isn't a minimum session time, and we are open to custom session times to suit your needs / availability. During the week, sessions can be booked between 2pm to 10pm, and weekend sessions between 10am to 6pm. Our **mixing services** are fixed at **\$75 per track**, don't hesitate to reach out for further information.

For **beat-making or songwriting projects**, book in a standard **\$30 per hour** session to work with our house producer / engineer Massimo, or the most suitable fit within our talented circle of producers [subject to their availability]. We will charge **\$300 per track**, only if you wish to take the track we produce to use for your own release.

We take our production sessions very seriously, providing a safe and fun creative space, to compliment the working style of each artist & get their best on record. This means we assess each project to assign the most suitable producer, who will spend time to have ideas prepared ahead of the session, making the experience fluent & productive, whilst leaving room for spontaneity.
